EXPERIENCE

Senior AI/ML Engineer

Frame Payments | Remote | Oct 2025 - Jan 2026

- Deployed an LLM document classification workflow using PydanticAI, Amazon Bedrock AgentCore, and Claude, surfaced as in-browser feedback for confidential uploads; reduced analyst follow-ups and resubmission requests ~90% by blocking miscategorized documents before review.
- Built restricted-item compliance screening that combines product images with structured submission metadata; translated banking-partner policy requirements into automated checks supporting onboarding across tens of merchants, multi-location operations, and catalogs with hundreds of items per location.

Associate III, Senior Software Engineer - Data Integrations

JPMorgan Chase & Co. | New York, NY | May 2023 - Apr 2025

- Pioneered firm-wide rollout of generative AI development tools (LLMs, GitHub Copilot, Codeium) as one of the first 500 engineers, delivering feedback that shaped secure, scalable deployment and leading internal workshops to boost productivity for technical and non-technical teams.
- Devised ML-driven anomaly detection framework for data health monitoring, reducing false positives by 25% and cutting manual review time, empowering risk teams to focus on critical alerts.

Senior Software Engineer

Stealth Web3 Startup | Remote | Mar 2022 - Jul 2022

- Architected a scalable NFT-collateralized lending DApp using React, Next.js, TypeScript, MobX, and ethers.js, enabling secure, performant on-chain loans.
